

SOLUTION ARCHITECT

Doppio Group is the leading software integration provider for global manufacturing and distribution organizations running Infor M3. Doppio Group provides integration services and scalable communication methods, resulting in improved business-to-business transactions and transforming the way businesses communicate.

Doppio Group is currently looking for an experienced Infor M3 (M3) solution architect to build scalable solutions that address customer problems. The Solution Architect will work closely with customers and the project team to deliver best-in-class solutions. This resource will support Doppio Group's pre-sales efforts and lead best practices for technical documentation.

Primary Responsibilities:

- Work with customers to understand its needs and requirements
- Collaborate with project team to translate requirements into scalable solutions
- Assist Business Development to define scope and estimates for the Statement of Work
- Ensure successful development and maintenance of technical documentation

Preferred Skills and Experience:

- 5 – 10 years of prior Solution Architect experience
- At minimum 3 years of M3 experience
- Detailed understanding of interface design, development and testing within M3
- Strong understanding of order entry and warehousing functional requirements
- Exposure to Manufacturing, Distribution, and Retail industries
- Experience with working on teams of all sizes, locally and remotely
- Ability to adapt to different environments
- Excellent communication skills
- Motivated self-starter
- Knowledge of M3 Business Engine, MI Programs, and Business Messages
- Must be well versed in ERP

Location:

While Doppio Group is headquartered in San Francisco, CA, we are open to considering strong candidates based elsewhere for remote employment.

Compensation:

The Solution Architect role is a full-time, salaried position with benefits. Doppio Group pays competitive market salaries and is an equal opportunity employer. Doppio Group will provide a work space and a computer.
